Computer Graphics, Lab Assignment 8

Handed out: May 22, 2019

Recommended due: 15:00, May 22, 2019

Hard due: 23:59, May 22, 2019 **(NO SCORE for late submissions!)**

Submit your assignment only through the lecture home at git address.

1. Write a program that draws a color-changing cube.

   A. Set the window title to **[studentID]-[assignment#]-[prob#]** and the window size to (480,480).

   B. Start from the code in 6-Lighting&Shading slides. Draw a flat-shaded cube. Make sure camera manipulation shortcuts '1', '3', '2', 'w' work.

   C. Use the following light setting:

   ```
   lightPos = (3.,4.,5.,1.)
   glLightfv(GL_LIGHT0, GL_POSITION, lightPos)

   ambientLightColor = (.1,.1,.1,1.)
   glLightfv(GL_LIGHT0, GL_AMBIENT, ambientLightColor)

   specularObjectColor = (1.,1.,1.,1.)
   glMaterialfv(GL_FRONT, GL_SPECULAR, specularObjectColor)

   glMaterialfv(GL_FRONT, GL_SHININESS, 10)
   ```

   D. If you press or repeat a key, the diffuse & specular color of the light and the ambient & diffuse color of the object should be changed as shown in the Table:

Key	Action
A	Change the light color to red
S	Change the light color to green
D	Change the light color to blue
F	Change the light color to white
Z	Change the object color to red
X	Change the object color to green
C	Change the object color to blue
V	Change the object color to white

   E. Submit a single .py file - **[studentID]-[assignment#]-[prob#].py**

2. Write a program that draws a smooth-shaded cube.

   A. Set the window title to **[studentID]-[assignment#]-[prob#]** and the window size to (480,480).

   B. Start from the code in 7-Lighting&Shading slides. Make sure camera manipulation shortcuts '1', '3', '2', 'w' work.

   C. Use **glDrawElements(),** not glDrawArray(). Refer the code in 6-Hierarchy&Mesh slides.

      i. Hint: In Gouraud shading, one vertex has only one normal. This makes using glDrawElements() easier.

   D. Use the following normal vector data:
vertex index	position	normal
0	(-1 , 1 , 1)	(-0.5773502691896258 , 0.5773502691896258 , 0.5773502691896258)
1	(1 , 1 , 1)	(0.8164965809277261 , 0.4082482904638631 , 0.4082482904638631)
2	(1 , -1 , 1)	(0.4082482904638631 , -0.4082482904638631 , 0.8164965809277261)
3	(-1 , -1 , 1)	(-0.4082482904638631 , -0.8164965809277261 , 0.4082482904638631)
4	(-1 , 1 , -1)	(-0.4082482904638631 , 0.4082482904638631 , -0.8164965809277261)
5	(1 , 1 , -1)	(0.4082482904638631 , 0.8164965809277261 , -0.4082482904638631)
6	(1 , -1 , -1)	(0.5773502691896258 , -0.5773502691896258 , -0.5773502691896258)
7	(-1 , -1 , -1)	(-0.8164965809277261 , -0.4082482904638631 , -0.4082482904638631)

E. Expected result:

F. Submit a single .py file - **[studentID]-[assignment#]-[prob#].py**
